

Baburao Patil College of Arts and Science Angar

Student Satisfactory Survey Report

In student satisfactory survey it was observed that B.Sc. III year students responded widely to all the parameters rather than B.A.III students. It may be due to the irregularity of Art faculty students in regular classes.

85% of students were satisfied with syllabus covered in the class and teaching methods adopted by faculty. It was found in the survey that faculty prepared thoroughly to satisfactorily for the lectures with effective communication skill with positive approach. During the survey it was found that students were satisfied with the internal evaluation adopted by the college and the faculty members also discussed the performance with students. Students also admire the college interest in promoting internship, field visits, and encouraging students to participate in extracurricular activities. Students were found satisfied with mentoring system adopted by the college by motivating students and to develop their soft skills, life skills and employability skills. 67% of students responded that faculty is using ICT tools for teaching learning along with use student centric methods such as experimental learning participative learning and problem solving methods to enhance teaching learning process. About 78% of students were found satisfied with use of cognitive methods used by the faculty for teaching learning process. About 85% of students were highly satisfied with quality of teaching learning process adopted in the college.

During Covid – pandemic about 75% of students were satisfied with online mode of teaching adopted by the college and discussions with students during lectures. About 78% of students were found to satisfied with preparedness of faculty for online mode of teaching with about 74% strongly agree about overall effectiveness of online mode of teaching.

Following were the most effective suggestions/observations by the students about the college.

College providing quality education with always something to learn new.

Lab facility is poor.

Post graduation should be started.

Development in infrastructure with increasing student strength.
